

RAYGLO

MEDICINAL SERIES

RADIATES AND RECREATES GOOD HEALTH

**MEDICAL GUIDE OF TREATMENT
FOR MOST FAMILY AILMENTS,
INCLUDING
CARE AND NURSING
OF CHILDREN.**

**WISE PARENTS ALWAYS KEEP
THIS CIRCULAR—
IT IS MOST HELPFUL.**

RAYGLO

Series

Supreme for Quality and Accuracy.

MO. PAM:

QV 26

1937

C97r

Always purchase your medicinal requirements from your family chemist. His qualifications fit him for the dispensing of doctors' prescriptions accurately and with the best drugs.

The private chemist not being under the control of a combine, can purchase his requirements as and where he wishes. He can choose one supplier for one ingredient and another supplier for another—so that with his knowledge of the best markets he orders each of his requirements from each firm renowned for super excellence for that particular line—thereby ensuring that the whole range of preparations he recommends, amongst which are "**RAYGLO**" preparations, consist only of the very finest quality procurable.

Buy from the family chemist, because he stocks only the best and is directly responsible for everything he recommends.

RAYGLO Series.

**Vitamin CREAM EMULSION OF
COD LIVER OIL, with Glycerine
and Hypophosphites.**

Vitamins have been proved to be the essential factors for the preservation of good health. Cod Liver Oil is rich in vitamins A and D, and when combined with the glycerine and hypophosphate of sodium and calcium it becomes one of the most valuable body building, sinew and muscle forming agents known to medical science. Growing children especially need it—the bone forming properties of "**Rayglo**" Emulsion ensure a strong development of the physique and create vigorous health in both old and young. "**Rayglo**" Cod Liver Oil Emulsion repairs wasted tissue, increases the vitality of the system so as to withstand the ravages of wasting disease. It is extremely palatable—Children of all ages love it—the oil cannot be tasted. It is excellent for treatment of chest troubles.

1/3, 2/3, 3/9 Bottles.

**TEMPERATURES OF THE BODY
IN DISEASE.**

The normal temperature of the body is 98·4 deg. by clinical thermometer. Some people have a permanent sub or below normal temperature. A rise of temperature to more than 98·4 degs. is usually an indication of fever and a physician should be consulted. Temperatures which rise to 103—105 degs. are in most cases dangerous.

INFECTIOUS DISEASES.

To be treated under Medical supervision.

DISEASE and SYMPTOMS.	PERIOD OF INCUBATION AND WHEN IT CEASES.	Time required to ascertain if Disease has been contracted after being exposed to infection.
Whooping Cough. Commencing like an ordinary cold, the cough becomes more convulsive until the whoop begins which is followed by vomiting. The face often starts to swell.	Incubation 8 days. It ceases after about 6 weeks or 2 weeks after whoop has stopped.	21 days.
Scarlet Fever. The throat is nearly always affected—becoming red and swollen. Rash comes out second day in form of small red spots until the whole body becomes scarlet.	Incubation 3-6 days. It ceases not less than 6 weeks from commencement and after sore throat and peeling of skin has disappeared.	11 days.
Chicken Pox. A rash of small red spots first appears followed with a clear watery fluid on face, back and head.	Incubation 14 days. It ceases after all the scabs have fallen off.	21 days.
Mumps. There is usually some swelling of the neck and pain below one ear, also difficulty in speaking and swallowing.	Incubation 21 days. It ceases not less than 4 weeks after commencing or a week after all swelling has gone.	25 days.
Ringworm Commences with grinding of the teeth, irritability, twitching and convulsions.	Incubation between 2-8 days. It ceases after sores have disappeared.	Ringworm usually makes its appearance very quickly after exposure to infection.
Measles Commences with a cough, running of the eyes and nose, sneezing often. Also aching of the limbs and fever.	Incubation 14 days. It ceases about 3 weeks after rash has disappeared.	17 days.
